ABOUT ME

Product-minded Frontend Engineer with over 4 years of experience. While my primary focus is mastering the React ecosystem and TypeScript, I possess the Fullstack expertise (MERN Stack) needed to build complete, scalable solutions.

I integrate design and engineering, creating functional, high-performance applications that follow modern architecture best practices.

EDUCATION

Udemy: React & MERN (2022 - Presente)

Resource with regular updates for language, library, and testing.

Universidad Tecnológica Nacional (2018 - 2021)

University Technician in Programming

Potrero Digital (2021)

Intensive training focused on Web Layout, Responsive Design, and JavaScript logic.

Digital House (2020)

Fullstack web development with a strong focus on layout and responsive design.

SKILLS

- **Core Stack**: React, Node.js, TypeScript, HTML5, CSS3, Databases.
- **Quality & Architecture:** Testing (Vitest), UX/UI Principles, Performance, Design Patterns, CI/CD.
- **Soft Skills**: Agile Methodologies, Effective Communication, Cross-functional Collaboration.

LANGUAGE

- Spanish: Native
- English: Intermediate (B1)

PROFESSIONAL EXPERIENCE

Frontend & Middle-end Developer | OSANA

OSANA | (April 2026 - Present)

Collaborate with cross-functional Agile teams (UX/UI designers, Product Owners, QA, and Backend engineers) to build high-impact healthcare digital products.

- Develop and maintain scalable web applications in the health-tech sector using Next.js, TypeScript, and Node.js.
- Engineer and optimize Middle-end / BFF (Backend-for-Frontend) layers, processing business logic and seamlessly integrating frontend UI with backend microservices (built in Java & Spring Boot).
- Build reusable component libraries and responsive user interfaces, prioritizing web performance, accessibility, and clean architecture.

Fullstack Web Developer

Independent Web Developer | (December 2024 - Present)

Architecture and development of a SaaS platform for collaborative task, event, and calendar management that integrates real-time notifications and instant updates.

- Build custom, full-featured web applications for diverse clients, utilizing React, Next.js, and TypeScript.
- Manage end-to-end development, from requirements gathering and UI/UX implementation to API integration and production deployment.
- Optimize client websites for search engines (SEO), performance, cross-browser compatibility, and mobile responsiveness.

Fullstack Web Developer

SanCor Salud | (September 2022 – December 2024)

As a Fullstack Developer with a primary focus on Frontend, I developed scalable solutions and refactored legacy code in an Agile environment. Fostered a culture of technical quality through daily code reviews and peer mentoring.

- Redesigned and improved processes (user inquiries, medical audit, medical services, billing, and permission management).
- Implemented accessible and responsive interfaces.
- Collaborated with cross-functional teams to build custom web solutions, integrating frontend interfaces with enterprise Java / Spring Boot backend services.

Fullstack Web Developer

ADEN Business School | (November 2021 - September 2022)

Collaboration with interdisciplinary teams to analyze requirements and develop custom solutions that optimized internal business processes.

- Reviewed and reorganized accounting flow processes for the billing of products, services, and general expenses.
- Worked closely with the Accounting department to align business logic with technical implementation.
- Collaborated with the Certifications and Titles department to fix errors and create new features for certification processes.
